

What will I talk about?

- Developing software for hardware
- Why?
- How? Architecture, tools, ...
- Starter kit

WOJTEK JAKOBCZYK

Myself

- 25+ years in software development
- 4+ years in Polyend as Head of Software/Architect
- Polyend Tracker, Play and more

WOJTEK JAKOBCZYK

Why hardware?

- Fun!
- Creative - challenges because of limitations
- Different - new perspective, learning experience, out of the box thinking
- Simpler - where it counts - UI, for instance
- End user perspective

WOJTEK JAKOBCZYK

Not that different, really?

- System-level languages already prevail in real-time audio
- All the tooling is the same or similar
- Linux

WOJTEK JAKOBCZYK

Architecture - hardware

- MCU/APU
 - CPU - ARM Cortex M4/M7/A
 - 32/64 bits, FPU, some SIMD, caches
 - RAM - 128 kB up to 2 MB
 - Flash - MBs
 - Peripherals - GPIO, I2C, I2S, SPI
- SDRAM
- Option: System-On-Module

WOJTEK JAKOBCZYK

Architecture - hardware

- Audio codec
- Display + input (buttons, pots, encoders, ...)
- MIDI
- USB, SD card, ...

WOJTEK JAKOBCZYK

Architecture - software

WOJTEK JAKOBCZYK

Architecture - software

Zephyr®

WOJTEK JAKOBCZYK

Architecture - software

- Audio buffers fill
 - Handle audio-related events
 - Incoming midi
 - Sequencer logic
- User interface
- System services - software updates, logging, ...

WOJTEK JAKOBCZYK

Architecture - software

- Threading vs interrupts
 - Linux - as on desktop
 - Bare metal
 - Audio buffers fill from codec interrupt
 - UI in main loop
 - Synchronization in the UI thread only
 - RTOS
 - Something in between

Working with hardware

WOJTEK JAKOBCZYK

Working with hardware

WOJTEK JAKOBCZYK

Prototyping platforms

- Raspberry Pi (Linux)
 - Audio shield / USB audio interface
 - Display
 - Shields with various input peripherals
- Electrosmith Daisy (bare metal / RTOS)
- Teensy (bare metal / RTOS)
- Zynthian (Linux)
- Eurorack dev modules

WOJTEK JAKOBCZYK

Open Source

- Zynthian
- Mutable Instruments Archive
 - <https://github.com/pichenettes>
- PreenFM3
